

GREEN DEAL BIOTECHNOLOGY

6-8 November 2023 Poznań Poland

Organised by  Environmental Biotechnology

The Environmental Biotechnology Division of the European Federation of Biotechnology would like to invite you to the [“Green Deal Biotechnology” conference](#). The event will take place in **Poznań, Poland** on **6-8 November 2023**.

The scientific programme will focus on the latest advances in achieving a circular economy and on the major challenges:

- Recovery of resources, including rare resources and novel bio-based value chains
- Healthy soil and food security
- Bioelectrochemistry for energy and water recovery
- Wastewater treatment
- Nanotechnology in environmental biotechnology
- Marine biotechnology
- Carbon capture
- Emerging micropollutants in aquatic and terrestrial environments.

Speakers include:

- Douglas Call, North Carolina State University, USA
- Katie Field, University of Sheffield, United Kingdom
- Ivo Frébort, Palacký University Olomouc, Czechia
- Jim Philp, OECD
- Peter Wehrheim, European Commission

The full list of confirmed speakers is available on the meeting website:

https://www.efbiotechnology.org/green_deal

Slots for short talks, flash poster presentations and poster presentations are still available.

The deadline for abstract submission and early bird registration is on **15 September 2023**.

Special offer for groups

If three or more members from the same organisation register, each member of the group will receive a **discount of 33%**. Moreover, at least one slot for an oral presentation per group is guaranteed.

Join us in Poznań!
